

UNITED STATES - EPA CODE INFORMATION

Basic Identification Information About This Chemical

Chemical Name:	3-(trimethoxysilyl) propyl dimethyl octadecyl ammonium chloride
CAS Number:	27668-52-6
U.S. EPA PC Code:	107401
CA DPR Chem Code:	2127 (Two DPR chem codes assigned to the same chemical) 6053 (Two DPR chem codes assigned to the same chemical)
Molecular Weight:	0
Use Type:	 Microbiocide
Chem Class:	 Quaternary Ammonium Compound
 View Related Chemicals
